CONTENTS

Volume 54, Issue Nos. 1–12 (2002)

International Journal for

NUMERICAL METHODS IN ENGINEERING

Issue No. 1

Extended preconditioners for the FETI method applied to constrained problems: D. J. Rixen 1

Flexible multibody dynamics based on a non-linear Euler–Bernoulli kinematics: F. Boyer, N. Glandais and W. Khalil 27

Buoyancy forces and the 2D finite element analysis of flexible offshore pipes and risers: M. Yazdchi and M. A. Crisfield 61

A comparative study of axisymmetric finite elements for the vibration of thin cylindrical shells conveying fluid: Y. Zhang, J. M. Reese and D. G. Gorman 89

An adaptive finite element framework for fatigue crack propagation: D. Givoli and R. Zusman 111

On a wildland fire model with radiation: M. I. Asensio and L. Ferragut 137

Issue No. 2

A BEM-based genetic algorithm for identification of polarization curves in cathodic protection systems: P. Miltiadou and L. C. Wrobel 159

A comprehensive catastrophe theory for non-linear buckling of simple systems exhibiting fold and cusp catastrophes: X. A. Lignos, G. A. R. Parke, J. E. Harding and A. N. Kounadis 175

This journal's homepage, where a Cumulative Author, Title and Subject Index is freely available, as well as a Conference Diary and Award Announcements, can be found at the address:

The *International Journal for Numerical Methods in Engineering* is covered by the following abstracting and indexing services: Applied Mechanics Reviews, BHRA Fluid Engineering Centre (Elsevier), Cambridge Scientific Abstracts/Materials Information, CompuMath Citation Index (ISI), Current Contents®/Engineering, Computing & Technology (ISI), Earthquake Engineering Abstracts (NISEE), Ei COMPENDEX PLUS, Ei Page One, Geobase (Elsevier), Geotechnical Abstracts (Geotext Services), Indian Society of Earthquake Technology Bulletin, INSPEC, International Aeronautical Abstracts & Database (AIAA), International Civil Engineering Abstracts (Anbar), International Petroleum Abstracts, ISI Alerting Services, Materials Science Citation Index (ISI), Mathematical Reviews, Mechanics, PASCAL Database (INIST), Science Citation Index Expanded (also known as SciSearch®) (ISI), Science Citation Index® (ISI), Shock & Vibration Digest (Sage), Tribology and Corrosion Abstracts, Zentralblatt für Mathematik/Mathematic Abstracts.

Free vibration of sandwich plates with laminated faces: W. X. Yuan and D. J. Dawe 195

h-Adaptive FE methods applied to single- and multiphase problems: W. Ehlers, M. Ammann and S. Diebels 219

A precise computation of stress intensity factor on the front of a convex planar crack: O. Ascenzi, L. Pareschi and F. Segala 241

A contact formulation based on localized Lagrange multipliers: formulation and application to two-dimensional problems: G. Rebel, K. C. Park and C. A. Felippa . . 263

QuickTrace: a fast algorithm to detect contact: H. C. J. Bruneel and I. De Rycke . . . 299

Issue No. 3

Physics-based preconditioner for iterative algorithms in multi-scatterer and multi-boundary method of moments formulations: J. v. Hagen and W. Wiesbeck 317

Non-local dispersive model for wave propagation in heterogeneous media: one-dimensional case: J. Fish, W. Chen and G. Nagai 331

Non-local dispersive model for wave propagation in heterogeneous media: multi-dimensional case: J. Fish, W. Chen and G. Nagai 347

Modelling of failure mode transition in ballistic penetration with a continuum model describing microcracking and flow of pulverized media: B. A. Gailly and H. D. Espinosa 365

A micro-mechanical damage model based on gradient plasticity: algorithms and applications: J. Chen and H. Yuan 399

Testing the asymptotic behaviour of shell elements—Part I: the classical benchmark tests: D. Briassoulis 421

Modelling friction near sharp edges using a Eulerian reference frame: applications to aluminium extrusion: B. J. E. van Rens, W. A. M. Brekelmans and F. P. T. Baaijens 453

Issue No. 4

Geometrically non-linear damage interface based on regularized strong discontinuity: R. Larsson and N. Jansson 473

Large strain finite element analysis of a local second gradient model: application to localization: T. Matsushima, R. Chambon and D. Caillerie 499

On boundary conditions of the characteristic based split (CBS) algorithm for fluid dynamics: P. Nithiarasu 523

A numerical upscaling method for an elliptic equation with heterogeneous tensorial coefficients: R. Luce and S. Perez 537

Stress recovery and error estimation for the scaled boundary finite-element method: A. J. Deeks and J. P. Wolf 557

An *h*-hierarchical adaptive procedure for the scaled boundary finite-element method: A. J. Deeks and J. P. Wolf 585

Elastic wave propagation in a 3-D unbounded random heterogeneous medium coupled with a bounded medium. Application to seismic soil–structure interaction (SSSI): E. Savin and D. Clouteau 607

Issue No. 5

Testing the asymptotic behaviour of shell elements—Part II. New limit tests: analytical solutions and the RFNS element case: D. Briassoulis 631

Stress analysis in continuous media with an edge dislocation by finite element dislocation model: K. Sasaki, M. Kishida and Y. Ekida 671

Genetic optimization of stiffened plates without the FE mesh support: J. L. Marcelin . 685

An improved unsteady, unstructured, artificial compressibility, finite volume scheme for viscous incompressible flows: Part I. Theory and implementation: A. G. Malan, R. W. Lewis and P. Nithiarasu 695

An improved unsteady, unstructured, artificial compressibility, finite volume scheme for viscous incompressible flows: Part II. Application: A. G. Malan, R. W. Lewis and P. Nithiarasu 715

Behaviour of isoparametric quadrilateral family of Lagrangian fluid finite elements: S. Gopalakrishnan 731

Sandwich shell finite element for dynamic explicit analysis: A. Tabiei and R. Tanov . 763

Issue No. 6

Boundary element analysis of reinforced shear deformable shells: P. H. Wen, M. H. Aliabadi and A. Young 789

Topology optimization of periodic microstructures with a penalization of highly localized buckling modes: M. M. Neves, O. Sigmund and M. P. Bendsøe 809

A hybrid topology optimization algorithm for static and vibrating shell structures: F. Belblidia and S. Bulman 835

A FEM model for the active control of curved FGM shells using piezoelectric sensor/actuator layers: X. Q. He, K. M. Liew, T. Y. Ng and S. Sivashanker 853

Modelling three-dimensional piece-wise homogeneous domains using the α-shape-based natural element method: E. Cueto, B. Calvo and M. Doblaré 871

Stress intensity factors for three-dimensional surface cracks using enriched finite elements: A. O. Ayhan and H. F. Nied 899

A vector level set method and new discontinuity approximations for crack growth by EFG: G. Ventura, J. X. Xu and T. Belytschko 923

Issue No. 7

Derived data structure algorithms for unstructured finite element meshes: J. Waltz . 945

Global parameterization of a topological surface defined as a collection of trimmed bi-parametric patches: Application to automatic mesh construction: F. Noël 965

The partition of unity quadrature in meshless methods: A. Carpinteri, G. Ferro and G. Ventura 987

Topology design of structures using a dual algorithm and a constraint on the perimeter: C. S. Jog 1007

An algorithm coupling the OSRC and FEM for the computation of an approximate scattered acoustic field by a non-convex body: X. Antoine 1021

Numerical integration of the stiff dynamics of geometrically exact shells: an energy-dissipative momentum-conserving scheme: I. Romero and F. Armero 1043

Analysis of general quadrilateral orthotropic thick plates with arbitrary boundary conditions by the Rayleigh–Ritz method: M. M. Saadatpour, M. Azhari and M. A. Bradford 1087

Issue No. 8

New superconvergent points of the 8-node serendipity plane element for patch recovery: K. M. Liew and S. Rajendran 1103

Numerical modelling of shear bands by element bands: X. Wang, D. Chan and N. Morgenstern 1131

A 3D contact smoothing method using Gregory patches: M. A. Puso and T. A. Laursen 1161

High-order artificial boundary conditions for ideal axisymmetric irrotational flow around 3D obstacles: C. Zheng and H. Han 1195

A hybrid extended finite element/level set method for modeling phase transformations: H. Ji, D. Chopp and J. E. Dolbow 1209

Multi-scale constitutive modelling of heterogeneous materials with a gradient-enhanced computational homogenization scheme: V. Kouznetsova, M. G. D. Geers and W. A. M. Brekelmans 1235

Issue No. 9

Obituary: Michael Crisfield 1261

Non-linear dynamic behaviour of flexible marine pipes and risers: M. Yazdchi and M. A. Crisfield 1265

A fictitious domain decomposition method for the solution of partially axisymmetric acoustic scattering problems. Part I: Dirichlet boundary conditions: C. Farhat and U. Hetmaniuk 1309

A consistent geometrically non-linear approach for delamination: G. N. Wells, R. de Borst and L. J. Sluys 1333

Inverse problems for estimating bottom boundary conditions of natural waters: H. F. de Campos Velho, M. R. Retamoso and M. T. M. B. Vilhena 1357

Adaptive hierarchical enrichment for delamination fracture using a decohesive zone model: M. A. Crisfield and G. Alfano 1369

Finite element analyses of wave propagations due to a high-speed train across bridges: S. H. Ju 1391

Issue No. 10

Anisotropic damage coupled to plasticity: Modelling based on the effective configuration concept: A. Menzel, M. Ekh, P. Steinmann and K. Runesson 1409

A coupled BEM-flexibility force method for bending analysis of internally supported plates: Y. F. Rashed 1431

The least-squares finite element method in elasticity. Part II: Bending of thin plates: B. Jiang 1459

Simulation of oscillatory wall shear stress in channels with moving indentations: E. Y. K. Ng, W. L. Siauw and C. K. Chong 1477

Modelling of short wave diffraction problems using approximating systems of plane waves: O. Laghrouche, P. Bettess and R. J. Astley 1501

Issue No. 11

Numerical inclusion methods of solutions for variational inequalities: C. S. Ryoo and R. P. Agarwal 1535

A new shear flexible cubic spline plate element for vibration analysis: B. P. Patel and M. Ganapathi 1557

Adaptive moving mesh methods for simulating one-dimensional groundwater problems with sharp moving fronts: W. Huang, L. Zheng and X. Zhan 1579

Topology optimization of resonating structures using SIMP method: D. Tcherniak . . 1605

A point interpolation meshless method based on radial basis functions: J. G. Wang and G. R. Liu 1623

A finite difference solution of non-linear systems of radiative–conductive heat transfer equations: F. Asllanaj, A. Milandri, G. Jeandel and J. R. Roche 1649

Issue No. 12

Analytical study and numerical experiments for degenerate scale problems in the boundary element method for two-dimensional elasticity: J. T. Chen, S. R. Kuo and J. H. Lin 1669

An objective finite element approximation of the kinematics of geometrically exact rods and its use in the formulation of an energy–momentum conserving scheme in dynamics: I. Romero and F. Amero 1683

Molecular dynamics and multiscale homogenization analysis of seepage/diffusion problem in bentonite clay: Y. Ichikawa, K. Kawamura, N. Fujii and T. Nattavut . . . 1717

A general and efficient formulation of fractures and boundary conditions in the finite element method: R. Juanes, J. Samper and J. Molinero 1751

Frame-indifferent beam finite elements based upon the geometrically exact beam theory: P. Betsch and P. Steinmann 1775
